Using College Readiness Indicators

Theresa Jahangir

GEAR UP  West Pre-Conference, Portland
September 29, 2013
Objectives

College Readiness Indicators:

• Research
• Purpose
• Use
What is college readiness?

“The level of preparation a student needs in order to enroll and succeed—without remediation—in a credit bearing general education course at a post-secondary institution” (Conley, 2007)
What are the indicators?
There has to be more to it than that…
What is CRIS?

A system of indicators that measures different dimensions of college readiness, allows for early identification of students needing additional supports to finish high school college-ready, and points to actions needed to accomplish that goal.
Dimensions of College Readiness

Academic Preparedness

Academic Tenacity

College Knowledge
The CRIS Framework

• Three key dimensions of college readiness
• A tri-level system of indicators to support action
• A menu of indicators
• Local contexts matter
• Cycle of Inquiry (COI) tool ties indicators to supports and actions
College Readiness Indicator Systems (CRIS)
## Academic Tenacity

<table>
<thead>
<tr>
<th>Dimension of College Readiness</th>
